## **DETAILED ACTION**

### ***Claim Objections***

1. Claim 3 is objected to because of the following informalities:

Claim 3, line 2, "the check" should be changed -- the chuck --.

Appropriate correction is required.

### ***Claim Rejections - 35 USC § 102***

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1-2 and 4-5 are rejected under 35 U.S.C. 102(b) as being anticipated by Pan (5,706,371).

Regarding claims 1 and 5, Pan, figure 1, discloses a fiber optic polarizer comprising:

- a chuck (10) defining a groove (11) in a face along a lengthwise direction thereof;
- a single mode fiber (12, left length of the chuck) installed on the face around one end of the groove;
- a polarization-maintaining fiber (12, right side of the chuck) installed on the face around the other end of the groove; and

Art Unit: 2839

- a polarization beamsplitter (13) disposed between the single mode fiber and the polarization-maintaining fiber;

wherein the polarization beamsplitter is positioned to respectively align with the single mode fiber and the polarization-maintaining fiber at two opposite ends thereof to allow unpolarized light from the single mode fiber to enter the polarization beamsplitter at one end thereof and an o-ray of a polarized light to leave the polarization beamsplitter toward the polarization-maintaining fiber.

Regarding claim 2, the polarization beamsplitter is fixed to a wafer above the chuck.

Regarding claim 4, the groove is V-shaped, and both the single mode fiber and the polarization-maintaining fiber are fixed thereto.

#### ***Allowable Subject Matter***

4. Claim 3 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

The following is an examiner's statement of reasons for allowance:

None of the reference discloses a box hermetically encloses the chuck and the polarization beamsplitter with portions of the single mode fiber and polarization-maintaining fiber exposed to an exterior, in combination with the other claimed elements of the embodiments recited.
